| 63 | UTC (GMT)                            | 0    | No  |                                   |                                   |
| 64 | UTC (GMT)                            | 0    | No  |                                   |                                   |

In countries where the DST switch date changes annually (e.g. Iran, Israel), the time zone has to be defined manually in the user time zone table (entries 80 – 99).

**Legend:**

- UTC: Universal Time Coordinate, equivalent to GMT
- DST: Daylight Saving Time
- DST Change: Daylight Saving Time changeover
- Standard → DST: Time change from Standard time (Winter time) to Summer time
- DST → Standard: Time change from Summer time to Standard time (Winter time)

**Example:**

2<sup>nd</sup> last Sun. Mar. (02:00) Switch over on the penultimate Sunday in March at 02.00 hours local time
